## Case Studies for Teaching Engineering Ethics

*A workshop for new and experienced teachers of engineering ethics*

**Tuesday 15 June 2010**

*Royal Academy of Engineering, 3 Carlton House Terrace, London, SW1Y 5DG*

This workshop will enable you to consider and actively take part in some highly interactive ethics case studies designed to engage students with the ethical aspects of decision making in engineering. The day will be of interest to academics just starting to teach engineering ethics within their programmes of study as well as those with several years experience.

During this workshop, you will:

- Consider a range of ways to develop teaching sessions focused around the discussion of specific cases.
- Work with others to produce your own detailed case studies.
- Share practical ideas and experiences.
- Find out about a range of resources available.

1030	Registration, tea and coffee
1100	<i>How to find case studies</i> Dr Lawrence Coates (University of Birmingham)
1120	<i>Experiencing a case study: From the student's point of view</i> Dr Rob Lawlor (Inter-Disciplinary Ethics Applied CETL, University of Leeds)
1230	Lunch
1300	<i>Developing a case study: The Hatfield train crash</i> Professor Ian Howard (University of Sheffield)
1400	<i>Writing your own case study: Audience participation</i> Professor Ian Howard (University of Sheffield)
1530	Group presentations
1615	Plenary discussion and feedback
1645	Afternoon tea and networking

To register for this event please complete the registration form on the IDEA CETL website:
