ENGINEERING IN AN
UNPREDICTABLE WORLD

Global Grand Challenges Summit 2019 Agenda

Monday 16 September

Afternoon Registration
Evening Welcome reception

Tuesday 17 September

Morning Registration

Welcome session:
The role of engineering in an unpredictable world

Opening keynote

Better businesses: What do AI and transformational technologies mean for the world of work?

Afternoon Ethical AI: what does 'good' digital technology look like?

Transformational technology: How will new innovations revolutionise our world?

Improving lives: The transformational impact of engineering innovation

Evening Intergenerational evening events

Wednesday 18 September

Morning	Opening address
	Student Co-lab competition final
	A matter of fact: Engineering to mitigate climate change in an uncertain world
Afternoon	Future cities: How do we create sustainable living places for 10 billion people?
	Future wellbeing: How do we sustain a healthy population of 10 billion?
	Closing session
Evening	Closing reception

In addition to the plenary sessions outlined above, the Summit will host a series of parallel sessions providing opportunities for more intimate and in depth discussion between inspirational engineering leaders, and the next generation of engineers, researchers, innovators and changemakers.
